

Key Facts Sheet: Fixed Wireless nbn™ services

This is essential information to help choose the right nbn Fixed Wireless plan for you.

Our Speed Options

Online Activity	Fixed Wireless nbn15 ¹	Fixed Wireless nbn25 ¹	Fixed Wireless plus ¹
Typical Evening Download Speed ²	13 Mbps	18 Mbps	28 Mbps
Typical Evening Upload Speed ²	3 Mbps	3 Mbps	4 Mbps
Browsing & Music			
Online Gameplay			
Standard Def Video			
High Def Video			
4K Video			

May be supported if there's no other activity on the line at the same time.

¹Wireless speeds are slower than fixed connections, may be impacted by cell congestion, and can only be determined after activation.

²Typical evening download and upload speeds (7pm-11pm). Speed may vary due to various factors and confirmed once connected. Fixed Wireless Plus offers a theoretical maximum speed of 75/10.

Important Stuff

Your nbn service will not work if your electricity goes out, unless you have a FTTP connection with an NBN backup battery installed.

Medical and Security Alarms

If you have a medical or security alarm, check to see if they will work with a Fixed Wireless nbn connection before entering a contract with us for an nbn service. If your medical or security alarm is not compatible, see if there are any alternatives available by contacting your alarm supplier.

Factors that can impact broadband speeds:

- In-home wiring
- The modem you are using
- Where your modem is located
- Network capacity and network traffic
- The nbn technology type at your home
- Electrical and Wi-Fi interference from other devices
- Distance from the Fixed Wireless tower

We can help you to maximise your nbn performance, just log a case at my.dodo.com or give us a call on 13 36 36
